Summary

Full-Stack Software Engineer proficient in Python, TypeScript, Next.js, and FastAPI, with experience engineering high-throughput backend services, interactive interfaces, and AI-integrated platforms. Proven track record in designing low-latency event ingestion pipelines, optimized PostgreSQL/TimescaleDB schemas, and containerized cloud-ready applications.

Technical Skills

Programming Languages: Python, TypeScript, JavaScript, SQL, C++

Frontend: React, Next.js, Tailwind CSS, Three.js, GSAP, Shadcn UI, Recharts

Backend & Databases: FastAPI, Flask, Express.js, PostgreSQL, TimescaleDB, SQLAlchemy, Prisma ORM, RESTful APIs, JWT

AI & Cloud: LangChain, LangGraph, RAG Pipelines, OpenAI API, Google Gemini API, Event Ingestion, Cloudflare R2 / S3, Docker

Tools & Workflow: Git, GitHub, Turborepo, pnpm, uv, Pytest, Alembic, Linux/Bash

Projects

StackUnderflow Nov 2025 – July 2026
Full-Stack AI Developer Platform *Next.js 16, TypeScript, PostgreSQL, Prisma, Gemini AI, Tailwind CSS*

- Developed a full-stack Q&A platform featuring real-time Markdown editing, syntax highlighting, and a voting/reputation system.
- Integrated Google Gemini 3.5 Flash via Vercel AI SDK to stream low-latency, context-aware code solutions directly to users.
- Designed relational PostgreSQL schemas with Prisma connection pooling, achieving sub-50ms latency for nested discussion threads.

FastAPI & Next.js Monorepo Blog Jul 2026 – Aug 2026
Full-Stack Monorepo Platform *FastAPI, Next.js 15, Python, TypeScript, SQLAlchemy, Alembic, PostgreSQL, Turborepo*

- Architected a Turborepo monorepo with pnpm workspaces, enforcing end-to-end type safety between FastAPI and Next.js.
- Developed asynchronous REST APIs with FastAPI and SQLAlchemy, optimizing query execution and concurrent transactions.
- Integrated Cloudflare R2 object storage with Pillow image compression, reducing media payload and bandwidth by over 60%.

Multi-Source AI Research Agent Sept 2026 – Oct 2026
Autonomous Web Research and Evidence Synthesis Platform *Python, LangGraph, Google Gemini, Bright Data, Streamlit, Reddit API*

- Developed a parallel web research agent that aggregates Google, Bing, and Reddit results to reduce manual research effort and improve source coverage.
- Designed concurrent LangGraph analysis nodes that extract verified facts, consensus, contrarian viewpoints, and community sentiment from multiple sources.
- Created an interactive Streamlit interface for real-time workflow tracking and generation of structured, citation-backed research reports.

Timescale Analytics Platform Sept 2026 – Present
Time-Series Data & Web Analytics System *FastAPI, TimescaleDB, Next.js 15, React 19, Recharts, Docker Compose, uv*

- Built an event ingestion pipeline using FastAPI async workers and a lightweight (<2KB) `navigator.sendBeacon` tracking script.
- Modeled TimescaleDB hypertables with 1-day chunk partitioning and automated retention, executing analytical queries in sub-100ms.
- Created an interactive analytics dashboard in Next.js 15 using Recharts, containerizing all services with Docker Compose.

Education

Chandigarh University Gharuan, Mohali, Punjab, India
B.E. Computer Science and Engineering *2023 – 2027*

- CGPA: 7.10/10.0
